**Well hello there!**

A warm welcome to our annual brochure.
This year has been about growth and definition as we now proudly take shape as Wallis Taylor Jewellery: a name recognising two iconic ladies with impeccable taste in jewellery and defined by strong, colourful and bold personalities. Inspired by their wonderfully unapologetic characteristics and inimitable style, this brochure focuses on the icons collection.

As always, there are pieces here that will make for the perfect seasonal gift or they may simply inspire an idea — and our beautifully curated portfolio of unique commissions is the perfect starting point for such an important gesture.

Do get in touch if there's something in particular you're after or if you would like to begin your own bespoke commission. Creating these pieces brings us such joy and we are endlessly grateful for the wonderful clients who let us set their love stories in stone.

Wallis Taylor Jewellery (formerly Natalie Teare Jewellery) is founded on unrivalled expertise, refined artistry, and an enduring passion for the beauty and romanticism of jewels.

Wallis Taylor Jewellery specialises in creating bespoke, gem-set jewellery — timeless pieces designed to make every woman feel distinguished, elegant, and effortlessly confident — and is committed to setting your love stories in stone.

Founded and creatively driven by Natalie Heywood, a respected jewellery designer and gemmologist with over 26 years' experience. Having specialised in jewellery during her Fine Arts Valuation degree, and as a fully qualified Fellow of the Gemmological Association (FGA) and holder of a Diploma in Diamond Grading (DGA), Natalie has worked within many high jewellery departments, including Cartier, Theo Fennell and Garrards.

In 2025, Natalie was honoured as one of the Top 100 F:Entrepreneurs. Recognised for her beautiful bespoke creations, her commitment to empowering women to honour their own moments and for her dedication to inspiring young women through gemmology workshops to have greater engagement with STEM subjects.
